EKFI+ Project

Overview of changes

December 2022, Deventer

Work in progess

- Work according Agile (loosely)
- Not set in stone!
- I prepared a discussion piece
- Presentation will we altered after each meeting with new stories, epics (and perhaps backlogs items in future)
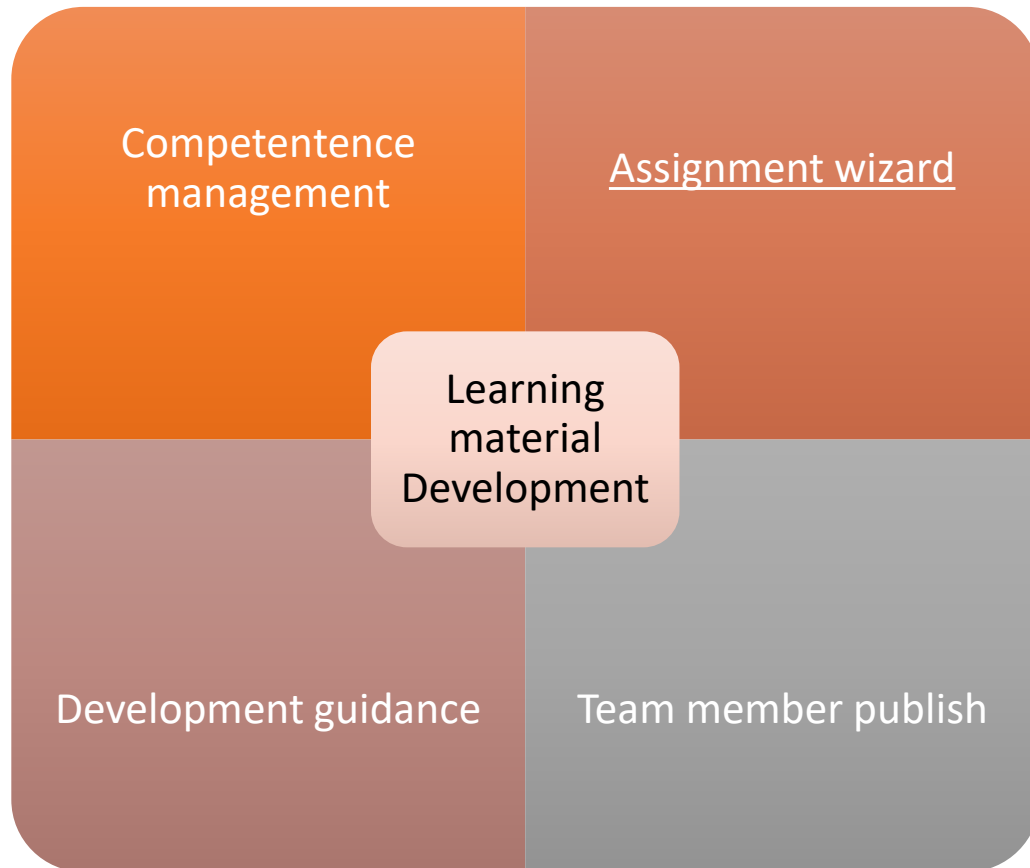

Initiative 1	
Epic 1	Epic 2
Story 1 · Story 2	Story 3

Initiative

- The EKFI platform should offer active users the process of jointly creating valuable new content.

Epics

Competence management	Assignment wizard
Development guidance	Team member publish

Learning material Development

- Competence management – used for matching team members

- Assignment wizard – help the initiator define an assignment (project) that is well written and clearly defined. Enough for possible team member to be enthousiastic.

- Development guidance – what are the basic steps in learning material development and how to setup team communication (Teams, Zoom, OneDrive, etc)

- Team member publish – All team member publish their material possibly in their language and are rewarded accordingly.

Competence management

- Stories
  - Extend the user competences on topics
    - Question: what extra competences do we need
  - Make preferences and scaling on competences
    - Question: do we need personal scoring on competences

Assignment wizard

- Stories
  - Show an overview on how to setup an assignment
    - Question: how does the workflow look like
  - Guide the user through the definition an assignment
    - Question: write detailed description per step in the workflow
  - The system proposes team members based on the assignment
    - What should the heuristic in setting up a team

Develop guidance

- Stories
    - Step by step pages on how to proceed
        - Question: What steps are there
        - Question: Are there different approaches to projects
        - Question: Do steps need to be finished before going on
        - Question: Do we want a final comment per step from the team
    - Team members must communicate to be able to work together
        - Question: is it enough to create links to shared environments
        - Question: do we want basic chat functions within a team

Team member publish

- Stories
  - The team members have easy access to a publish of the material after closing the project.
    - Question: do we need to predefine all fields in the last step of the guidance
    - Question: which fields are to be filled out by the seperate team members
  - Scoring in one language is scoring in all languages
    - Question: do we want that the material is linked and that reviews are copied over all linked languages
    - Question: do we need different scoring in teams
