

# EKFI – Testing the Tool

January 2021

By Eva Bouwman - Stivako

# OWN EXPERIENCES

- Uploading = time consuming (barrier?)
- Preparation = vital; helpdoc on front page/add material?
- Steps 4 = confusing; 'go back to upload' Can we do all-in-one?
- 500 characters is too limited; 1000 possible?

# St. LUCAS COLLEGE: TESTED WITH FEEDBACK

Feedback on the tool in general (after e-mailing):

- Compares to an 'intranet' kind of environment, with:
- A collection of "dead documents" (no personal/verbal explanation)
- No time now; teachers are overloaded
- He always loses his login details and is therefore no 'fan' of a closed system.

# St. LUCAS COLLEGE: TESTED WITH FEEDBACK

## Feedback on the testing of the tool:

- Uploading: confusing, lot of information needed
- Takes a long time to upload
- The sequence of uploading is unclear (first the image and preview, then go back to upload, then publish).
- Search function does not work

# FEEDBACK FROM OTHER SCHOOLS / TEACHERS

In general (calls after e-mailing):

- No time now; teachers are overloaded
- Everything is stored digitally in the school's private environment
- As a result of corona, technology has overtaken us in time
- Our teachers do not want to share their own material
- We don't use fixed learning material packages anymore, teacher determines himself what to use
