

# EKFI – Exchange Knowledge for Future Innovation.

Tallinn Polytechnic School opinion about the platform

Ivar Kaselaid; Aivo Brenner

- Impossible to upload the videos, too little space
- Should the videos be in native language, with subtitles or read on?

- A bit unclear how the barter system really will work. Have had the discussions several times, but may be it could be good to put down (in written form) the rules, so everybody who is somehow connected with the platform could understand clearly what to do to get the points etc.

- Who will be the experts who assess the materials? For example in Estonia we may not have such experts or noone is willing to do that, then what?

- Partners for Estonia are school from Finland GRADIA Jyväskylä
- Latvia, Riga State Technical School
